To: Duracell Strategic OEM Customers

Alkaline Battery Transport Compliance

This is to confirm that Duracell alkaline batteries pass the Vibration and other tests as called out in the ANSI C18.1, Part 2 and ANSI 60086 specification documents and as indicated in Duracell's Quality Specification for Alkaline Batteries. These batteries are not considered hazardous under the current regulations and are acceptable for truck, sea and air transport. Please refer to Special Provision 188 of the UN recommendations for more details.

Please feel free to contact me if you require any additional information period.
